

Word from the Director of the School of Accounting, Prof Frans Prinsloo, about the Grade 11 Accounting School

We are very excited about being able to offer our third Grade 11 Accounting School, which will be run in partnership with PwC, a leading international audit firm.

This programme will draw on the expertise of our Accounting 1 staff, who have thorough knowledge of the requirements for the grade 11 curriculum. The teaching model to be followed in this school will replicate the highly commended teaching model used in Accounting 1 on the BCom (Accounting) programmes.

This Grade 11 School builds on the successes of the Spring School of 2013 and Winter Schools of 2014 and 2015, as well as the Grade 12 Accounting School that we offered for the last four years. We trust that the Grade 11 School will not only deepen learners' knowledge and skills in grade 11 Accounting, but also enhance learners' enjoyment of the subject - and will provide learners with insights of what it is like being at university.

The theme of this year's Grade 11 Accounting School is "*your future, your tomorrow*". Given that the end of your time at school is fast approaching, it is appropriate that you start considering what you will do following the completion of grade 12. Therefore, in addition to the sessions devoted to grade 11 Accounting, about 60 minutes each day will be spent on providing you with relevant information about possible career opportunities and university study.

We are looking forward to meeting you at the NMMU/PwC Grade 11 Accounting School from 4 July to 7 July 2016.

Best wishes

Prof FE Prinsloo
Director: School of Accounting

Word from the Sponsor of the Gr 11 Accounting School, Mr Ash Rathan (PwC)

"Welcome to the opportunity of a lifetime!

PwC fully supports the NMMU's initiative to improve your skills in the subject of Accounting, and sharing with you the exciting opportunities that a degree in Accounting can provide you as a career path, during the 4 day school. It is vitally important to invest in your future through education, and in choosing a career in Chartered Accountancy, you will not only be investing in *your future* but the future of your country too. Every day in South Africa, Chartered Accountants play an important role in society, the economy, business and industry, education and many other areas of our day to day life. The South African Chartered Accountant is recognised world-wide, and ranks amongst the most respected in the world. I welcome you to seize this wonderful opportunity to learn, enquire, have fun but above all - enjoy the experience!"

Mr Ash Rathan
